Opposition to BESS project in San Juan Capistrano

I oppose this project. My home is just over the hillside to the proposed site and is already under an elevated fire danger posture from the Orange County Fire Authority and my insurance company. Lithium battery fire danger is well known. Having a facility like this, in an already high fire danger area, represents inappropriate land use and a danger to the community. The permitting requested, in opposition to the city of San Juan Capistrano's City Council's permit denial. is additionally inappropriate.

Thanks.
