Return to Promised 2023 RebateCredit Eligibility

I am so disappointed with the State of California not acting on the funding for HEEHRA sooner. Now it looks HEAR, HOME, HVAC and any of the other H words might be too late for any funding. When information was given out at the end of 2022 and first of 2023, the facts of credits and rebates were represented as just around the corner—no later than the end of 2023. I am certain that my husband and I were not the only ones to go forward with purchases and believe we would get our rebates because that is what all the government information indicated. We had a “well-let’s get on this and help California, our Country and the Planet” attitude.

Now we are not going to be able to get our expected refund because of the delay of funding rules and regulations restricting rebates qualification to a later date? That also means we do not have that rebate to help us go forward with replacing our other gas appliances.

This money was an investment in our Nation and makes a difference in our life. Please make the programs eligibility retro-active to 2023.

Thank you,
C. Sandra Barbon
