Lithium battery facility

. They are going to try to put a toxic lithium ion battery storage right above the church which is right down the street from us. It will reach into our water if something happens. The fire doesn't go out with water. It has to burn out on its own, and if it catches fire to dry breath brush, we're in trouble will be considered high risk insurance companies probably won't even share us, and our properties will be worthless to all the damage to our health into the wildlife, please fight with us. I'm totally against it!
