Opposition to project

The location of the proposed energy storage project is negligent. The area is prone to fires, has only one way in and out, and put the environment (animals, plants and residents) at risk.

The local residents must have a say in what is built in our communities. It's frustrating to see that companies can bypass what the community says and go straight to the state departments who don't know anything about the the local fabric of our city. I vehemently oppose this project.
