Respect

I totally oppose this project and support the local people that are against it.

Can you prove without a doubt that these windmills will not harm the local bird population?

Can you prove without a doubt that these windmills and every part of them will last a minimum of 30 years?

Can you prove without a doubt that these windmills will not require and fossil fuels to operate?

No you cannot answer yes to any of those three basic questions. So the project itself will harm our environment. I guess you should have thought twice before removing the dams that were providing plenty of clean energy.

Just build fish ladders around the dams and the fish issue is solved.
