Proposed Lithium Battery Storage Facility in San Juan Capistrano

Building a lithium battery storage facility in San Juan Capistrano is a reckless and dangerous proposition. The area is surrounded by homes, schools, churches, natural habitat and wildlife. Fires occur frequently in such facilities and such an occurrence could impact thousands of residences, schools and churches surrounding the area by causing toxic fumes, fire damage, lower property values, and long term health issues. A fire would impose on the local fire department, cause expansive, long lasting evacuations and create possible closures in both directions on Highway 5, and nearby Metrolink and Amtrak trains. A remote, unpopulated area would be a healthier, safer, better choice. Please do not grant Compass Energy permission to proceed with this dangerous project.
