I object to the sale of Rancho Capistrano

I object to the sale of land by Saddleback Church to the energy company for the purpose of battery/energy farm and storage. This area is prone to drier than normal conditions and increased fire risk. All mitigation attempts are awesome, but we all know they are only predictions of opportunity.

Additionally, this space is the only major thoroughfare to the south, so any disaster in this area would block Emergency Response as well as citizens.

Iâ€™m not opposed to anyone selling their property. Iâ€™m opposed to the proposed use of said land.

Thanks
