Saddleback Church E Storage

I 100% oppose and disagree with the proposed energy storage field on Saddleback Church Rancho Capistrano location. While I understand the need for more available electricity with the increased demand, this is to the location. It is next to hillsides with homes on the ridge, brush, etc. As we have learned, in the event of a fire it takes days to extinguish this sort of fire. Water does not extinguish. Look at the recent fire that shutdown Highway 15. There are undeveloped areas that are more appropriate. This is not safe in this location with the proximity to homes, water taxable, eroded land, 5 freeway, wildfire area, etc. Do the right thing and do not approve. The city of San Juan Capistrano is against it and voted against it, the city of Laguna Niguel is against it, the company purchasing has now bypassed and gone straight to you. We will hold all of you accountable. Do not approve. It is not the appropriate location.
