## **Proposed Battery Energy Storage UNSAFE AREA**

I live on the ridge top above the proposed 13 acre battery energy storage facility. It is a hazard to our area in many ways. First of all it is in a high brush fire hazard area. It is already difficult for us to get homeowner insurance now. Secondly, it is a hazard to our environment. The proposed location is along the San Juan Creek area that runs to the ocean. It is also right along the Amtrak train tracks and the 5 Freeway.

After researching the dangers of these facilities I found out several of them across the country have exploded,

This would wipe out the homes above the site, the San Juan Creek, the Amtrak train and close down the entire 5 Freeway. I have very much opposed to this project moving forward.
