NO BATTERY PLANT

San Juan is a historic city and we are going to ruin it with this eyesore ! Not to mention the risks it poses being so close to my community I live in as well as the wild life and fire hazard this will have. No one wants this plant near our children and our homes. We want to preserve the quaintness of this town and don't see how this will benefit anyone but the money hungry people who own that land. Please reconsider allowing something like this into our community where we eventually will have to pay the price. The fact it's even being considered is raising a ton of red flags on who really is in power and who wants to actually protect the citizens who live here. NO TO THE BATTERY PLANT !!!
