Stop the BESS facility in San Juan Capistrano

Hello, I am a nearby resident to the proposed BESS facility in San Juan Capistrano, California. I oppose the proposed project due to my concern for the high risk factor of fire and environmental contamination of the nearby Trabuco creek. First, I live nearby and I'm concerned that a facility fire will easily spread to the hillside nearby and then to my property. Endangering not only my neighbors, but myself, family, and pets. I'm also very concerned about the potential runoff from hazardous chemicals should a fire be extinguished and the contents overflow into the nearby Trabuco creek. This creek not only flows directly into the ocean near beaches visited by families, but local schools also use the creek to teach and study the local environment. Please do not approve the proposed BESS facility project.
