## **Compass Energy Storage**

Placing a battery storage plant so close to a densely populated area is asking for a future issue. There has been no long term study done on the effects on people if the batteries were to leak or worse, burn. This whole area is considered a high risk burn zone by Fire management and insurance companies. Go out to the desert off the 10 fwy where the population is almost zero and the area can't burn. Don't be dangerously irresponsible.
