Lack of Information

As a resident of Westmorland, I am highly concerned over the potential environmental and health impacts these plans can have on the north-end community of Imperial County. I am alarmed over the lack of robust community outreach. The directly impacted communities were not provided information in a timely and accessible manner. Without time and access to vehicles, it is difficult for communities in the north-end to attend meetings away from their vicinities. The lack of meetings in the north-end, i and further studies on water, air quality and potential risks is alarming. All residents have the right to live in a safe and healthy environment and no outside entity should infringe on that.
