No lithium battery storage here!

I am a resident of this beautiful city. Please do not put a battery storage facility on the saddleback property. This would alter the surrounding hillsides and landscape in a blink of an eye. Fire danger is real , not to mention the toxic smoke coming that would come from this . These batteries burn for days to weeks, and are not safe to be placed so close to homes and people. There has to be some other alternative site. The now defunct San Clemente nuclear power plant. I suggest there .
Y.Gigliello.
