## **Docket number 24-BSTD-01 and 2025 Energy Code**

I have read some of the remarks made by commenters with regards to VRF system first cost. In our opinion they do not reflect what we have seen in the marketplace. We have completed multiple small, medium and large projects using different delivery methods. Under the current code and systems available the heat recovery VRF system has been a system of choice for projects pursuing all-electric with high energy efficiency and low first cost.
