## **ENGIE Compass Energy Storage, Docket Number 24-OPT-02**

The local jurisdiction conducted public meetings, vetted the proposal, and listened to a myriad of compelling reasons pro and con concerning the BESS project. My statement is attached provides insight in the unique human, property and economic risks (to the State of California and those locally) associated with this particular BESS location. I request that the CEC take this BESS proposal off of the "fast track" review process and more appropriately, deny the project outright.
