Opposed to BESS project in SJC

I am vehemently opposed to this proposed project the site is surrounded by dry brush. It will ignite in the next 10 years. With battery fire that won't stop burning, it will impact countless apart events, homes, schools, skilled nursing facilities and hospitals. All are within 2 miles of this project (and most of them downwind). This project represents a huge eyesore to our community. This land was once tribal land and was then farmed for oranges. To turn it into this is a complete disregard for the history and charm of SJC. I should also mention the creek that runs right through the proposed site drains to the ocean. Environmentally this is also a terrible idea.
