Windmill turbines in Shasta area

I have seen the effects of wild fires first hand. Installing wind turbines will have a negative consequence. Shasta Weed and other forest areas are a potential risk with this type of equipment. Many residents in these areas are now being denied fire insurance on their property or unaffordable insurance. Please put people first you say wind turbines are cost effective. They have the potential to do more damage. Think of the environmental damage such as AIR, forest, wildlife. Not to be missed lives, homes, businesses etc
