Phase I Environmental Site Assessment Update for the Soda Mountain Solar Project, LLC, San Bernardino County, California

JULY 2024 (REVISED SEPTEMBER 2024)

PREPARED FOR

Soda Mountain Solar Project, LLC

PREPARED BY

**SWCA Environmental Consultants** 

# PHASE I ENVIRONMENTAL SITE ASSESSMENT FOR THE SODA MOUNTAIN SOLAR PROJECT, LLC, SAN BERNARDINO COUNTY, CALIFORNIA

#### Prepared for

Soda Mountain Solar Project, LLC 110 Edison Place, Suite 312 Newark, New Jersey 07102 Attention: Dustin Thaler, VC Renewables

#### Prepared by

SWCA Environmental Consultants 320 North Halstead Street, Suite 120 Pasadena, California 91107 (626) 240-0587 www.swca.com

SWCA Project No. 68347

July 2024 (Revised September 2024)

#### **EXECUTIVE SUMMARY**

This executive summary presents the results of a Phase I Environmental Site Assessment (ESA) completed by SWCA Environmental Consultants (SWCA) for the proposed Soda Mountain Solar Project, LLC, a portion of land proposed for the construction of a solar energy facility on approximately 2,670 acres of land administered by the Bureau of Land Management (the subject property). The subject property is primarily located along the east side of Interstate 15 (I-15) approximately 6 miles southwest of Baker, in unincorporated San Bernardino County, California. A proposed generation-tie (gen-tie) line crosses I-15 in the northern portion of the subject property. The subject property is within all or part of Sections 29–32, Township (T) 13 North (N), Range (R) 8 East (E); Sections 1 and 11–14, T12N, R7E; Sections 6–8 and 18, T12N, R8E; and Sections 25 and 36, T13N, R7E.

The purpose of this Phase I ESA is to satisfy part of the lender's due diligence requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act liability, and for project finance.

The following list presents selected primary findings of this Phase I ESA:

- SWCA's review of historical topographic maps and aerial photographs dating from 1933 found that the subject property was vacant desert land in 1933 and largely remains so today. By the late 1950s, a transmission line was mapped through the west end of the gen-tie line portion of the subject property. A borrow pit was visible in the southwest corner of the subject property on photographs dated between 1978 and 1983. The past use of the subject property is not considered to be a recognized environmental condition (REC). The following was noted regarding the adjoining properties:
  - Rasor Road Service, Inc. (a gasoline service station) was located on a southwest-adjoining property since the late 1970s.
- SWCA's contact with Ziad Alaywan, representing APEX Energy Solutions, on July 1, 2024, did not identify anything that SWCA considers to be a REC.
- SWCA attempted to contact the landowner of the subject property, the Bureau of Land Management, at the time of reporting a response had not been received.
- SWCA's review of a June 13, 2024, Environmental Data Resources, LLC (EDR), environmental database search report and supplemental records from state and federal regulatory databases identified the following:
  - The subject property is not identified in any of the regulatory databases reviewed by SWCA.
  - Rasor Road Service, Inc., mapped on the subject property by EDR but physically adjoining the west side of the subject property at 66150 Rasor Road, is listed on the following databases: Hazardous Waste Tracking System (HWTS), underground storage tanks (USTs), California Emergency Response System Hazardous Waste (CERS HAZ WASTE), CERS TANKS, Emissions (EMI), San Bernardino County Permits, and CERS. The HWTS database indicates the site is designated as an inactive, permanent gasoline service station. The facility contains an unspecified number of USTs associated with a gasoline service station. No leaking USTs have been reported at this facility. The CERS database identifies this facility as a chemical storage facility. Multiple CERS violations are noted at this facility, including failure to test leak-detection equipment every 12 months, failure to obtain a UST construction permit and plan approval, failure to maintain UST records, failure to comply with any of the applicable requirements of the

permit, and failure to maintain secondary containment, among others. All violations except one are noted as returned to compliance. The most recent violation was issued on March 4, 2022, during secondary containment certification for fill sump failure during testing. The facility is required to submit a scope of work for the repairs for all failures that were recorded during the certification. Because of the location with respect to the subject property and the status of the listings, and because testing as recently as March 2022 would have likely identified potential leaks, this is not considered a REC for the subject property.

- No gas transmission pipelines are mapped on or near the subject property. One hazardous liquid pipeline that possibly will be crossed by the proposed gen-tie line is mapped west of I-15. No pipeline incidents (gas) or accidents (liquid) are reported on or near the subject property.
- SWCA's reconnaissance of the subject property on June 17–18, 2024, verified that it is almost entirely vacant desert land. SWCA did not identify any RECs during the site reconnaissance. The following was also observed:
  - An unimproved roadway runs through the main portion of the subject property in a general northeast—southwest orientation.
  - O An electrical transmission line runs through the proposed substation portion in the northwestern part of the subject property.
  - A gasoline service station (Rasor Road Service, Inc.) is southwest of the subject property. The remainder of the parcels in the vicinity of the subject property consist of vacant desert land.
  - No significant quantities of hazardous substances or petroleum products were observed on or adjoining the subject property. No evidence of significant spills, ground staining, unusual odors, or potential contamination was observed on or adjoining the subject property during the site reconnaissance.

The information presented in this report is intended for the exclusive use of Soda Mountain Solar Project, LLC; and its affiliates, underwriters, lenders, and counsel. Reliance by any other parties on the information presented herein is the sole responsibility of said parties. This Phase I ESA report is viable for 180 days following the earliest date of any of the following components of all appropriate inquiries: interviews, the environmental records review, the site reconnaissance, and the declaration of the Environmental Professional. **This Phase I ESA report is viable for 180 days following June 13, 2024** (the date of the environmental database search report).

We have performed a *Phase I ESA* in conformance with the scope and limitations of ASTM International Standard 2247-16 of the *subject property*, as described in Section 2 of this report. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this *report*. **This assessment has revealed** *no RECs, controlled RECs*, or *significant data gaps* in connection with the *subject property*.

#### 1 INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) completed by SWCA Environmental Consultants (SWCA) for the proposed Soda Mountain Solar Project, LLC, a portion of land proposed for the construction of a solar energy facility on approximately 2,670 acres of land administered by the Bureau of Land Management (the subject property). The subject property is primarily located along the east side of Interstate 15 (I-15) approximately 6 miles southwest of Baker, in unincorporated San Bernardino County, California. A proposed generation-tie (gen-tie) line crosses I-15 in the northern portion of the subject property. The subject property is within all or part of Sections 29–32, Township (T) 13 North (N), Range (R) 8 East (E); Sections 1 and 11–14, T12N, R7E; Sections 6–8 and 18, T12N, R8E; and Sections 25 and 36, T13N, R7E.

# 1.1 Purpose

The purpose of this Phase I ESA is to satisfy part of the lender's due diligence requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability, and for project finance.

This Phase I ESA was completed in general accordance with ASTM International (ASTM) Standard E2247-16, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property (ASTM 2016). Standard E2247-16 incorporates Standard E1527-21 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process [ASTM 2021]) by reference and is intended to be no less stringent than Standard E1527-21. Therefore, this report reflects recent updates to and best practices of Standard E1527-21.

The goal of the processes established by this practice is to assess the property, to the extent feasible pursuant to the processes prescribed by ASTM, for the presence of recognized environmental conditions (RECs), defined in the ASTM standard as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." De minimis conditions, which generally do not present a threat to human health or the environment and that generally would not be the subject of enforcement actions if brought to the attention of appropriate regulating agencies, are not RECs.

According to ASTM, all appropriate inquiry (AAI) is not an exhaustive assessment of a clean property. There is a point at which the cost of information obtained, or the time required to gather it, outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of the practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.

# 1.2 Scope of Work

SWCA completed this Phase I ESA in accordance with the scope of work included in Appendix A. Deletions or deviations from ASTM Standard E2247-16 are documented in Section 1.3 of this report. To achieve the objective referenced above, SWCA completed the following tasks:

- Requested ASTM-specified information from the user of this report.
- Surveyed relevant documents in order to assess the subject property's physical setting.
- Reviewed historical topographic maps and historical aerial photographs.
- Reviewed a previously completed Phase I ESA report for the subject property.
- Attempted to interview a representative of the owner of the subject property.
- Reviewed appropriate federal and state environmental records.
- Completed a reconnaissance of the subject property and also observed adjoining properties.
- Prepared this Phase I ESA report and referenced all information sources herein.

This Phase I ESA did not include observation, assessment, or reporting of issues identified in the ASTM standard as non-scope considerations, such as asbestos-containing materials, lead-based paint, naturally occurring radon, non-hazardous wastes and materials, mold or microbial growth conditions, biological agents, and medical wastes. No soil, air, or water samples were collected for this Phase I ESA.

SWCA warrants that a qualified Environmental Professional was responsible for the preparation of this report in conformance with ethical business practices and industry standards. Appendix B contains the credentials of the Environmental Professional responsible for preparation of this report.

#### 1.3 Limitations

Some standard sources are not readily available and thus were not used to prepare this Phase I ESA. This Phase I ESA is intended to minimize, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property, with reasonable limits to time and cost. Data gaps, limitations, and deviations from the ASTM standard are described below.

- SWCA was not provided with title reports or judicial records of environmental liens and activity and use limitations (AULs) for the subject property.
- Because of the lack of available aerial photographs and U.S. Geological Survey (USGS)
  topographic maps, the commonly used 5-year interval between photographs and topographic map
  dates could not be followed for all photographs and maps reviewed. Although some uses can be
  determined, the resolution of historical aerial photographs limits SWCA's ability to identify
  on-site details.
- As is customary with large-scale rural projects, the site reconnaissance focused on pre-identified
  areas of the subject property and adjoining properties with indications of activity that could have
  resulted in the presence of a REC, especially areas where hazardous substances or petroleum
  products may be used, handled, managed, or stored or may have been used, handled, managed, or
  stored in the past. SWCA did not walk transects of the vacant undeveloped portions of the subject
  property. Therefore, not all land surfaces were directly observed.
- SWCA attempted to contact the landowner of the subject property, the Bureau of Land Management, at the time of reporting a response had not been received.

Although SWCA's scope of work precludes SWCA from providing a warranty or guarantee regarding the presence or absence of hazardous materials that could potentially affect the subject property, SWCA has provided its best professional judgement on the presence or absence of such materials. This Phase I ESA was not performed to provide a comprehensive evaluation of business environmental risk.

Because alternatives to standard sources served as a solid basis of learning past property uses and conditions, and because supplemental data sources provided sufficient information, these gaps in the data are not considered to be significant and are not thought to have affected SWCA's ability to identify RECs on the subject property. SWCA's findings and conclusions within this assessment do not take into consideration the limitations identified in this report.

#### 1.4 User Reliance

The information contained in this report relates only to the subject property and should not be extrapolated or construed to apply to any other location. The description of the subject property as provided herein represents the conditions of the subject property as it existed on the date of the site reconnaissance and data source searches. Findings are based solely on the above-referenced methods and limitations.

The information presented in this report is intended for the exclusive use of Soda Mountain Solar Project, LLC; and its affiliates, underwriters, lenders, and counsel. Reliance by any other parties on the information presented herein is the sole responsibility of said parties. If the Phase I ESA will be relied upon by a different party than the user for whom the Phase I ESA was originally prepared, that party must also satisfy the user's responsibilities in Section 6 of ASTM Standard E2247-16.

This Phase I ESA report is viable for 180 days following the earliest date of any of the following components of AAIs: interviews, environmental records review, site reconnaissance, and the declaration of the Environmental Professional. **This Phase I ESA report is viable for 180 days following June 13, 2024** (the date of the environmental database search report). Continued viability of this report is subject to ASTM Standard E2247-16, Sections 4.6 to 4.8. The validity of the report can be renewed by updating the components of AAIs listed above.

#### 2 PROPERTY DESCRIPTION

The subject property consists of approximately 2,670 acres of undeveloped desert land primarily along the east side of I-15 approximately 6 miles southwest of the town of Baker, in San Bernardino County, California. A proposed gen-tie line crosses I-15 in the northern portion of the subject property. The San Bernardino County Assessor's Office identified the subject property as 15 government-owned parcels administered by the Bureau of Land Management (San Bernardino County 2024).

The surrounding area is primarily similarly vacant desert land; a gasoline service station adjoins the southwest corner of the subject property. The subject property is depicted in Figures 1 and 2, and parcel details from the county are provided in Appendix C.

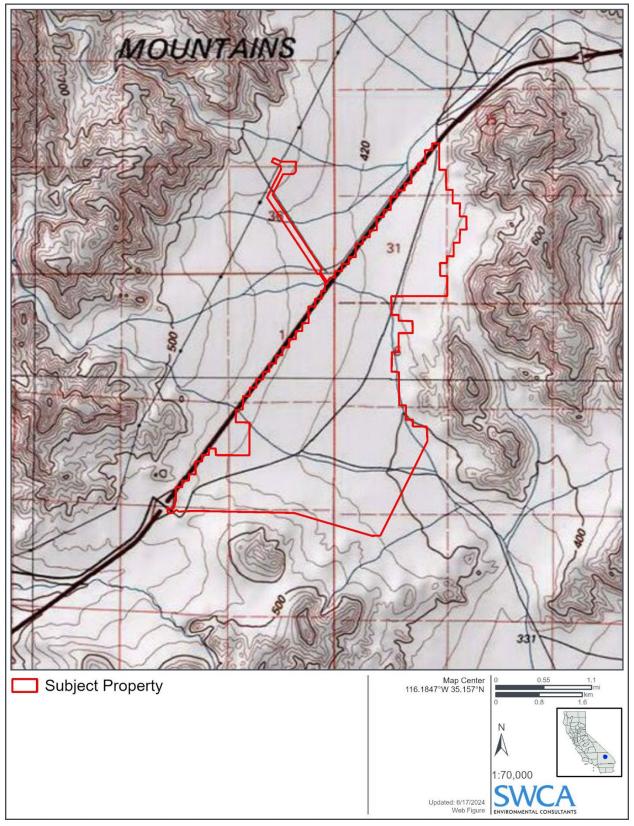

Figure 1. Topographic map of the subject property.

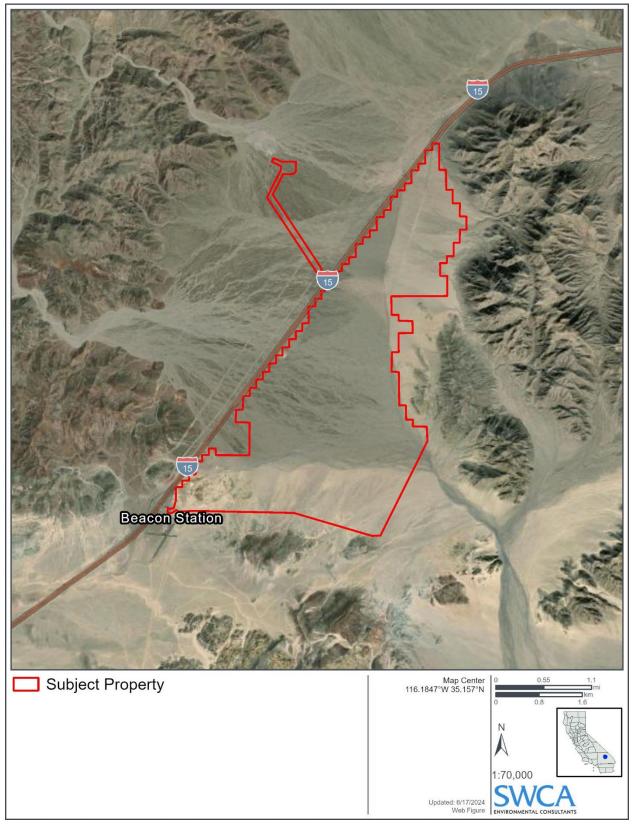

Figure 2. Aerial photograph of the subject property.

#### 3 PHYSICAL SETTING ANALYSIS

SWCA reviewed pertinent key physical characteristics of the subject property, as obtained from available natural history information sources.

# 3.1 Topography

USGS topographic maps of the region indicate that the subject property is situated within a valley between two peaks of the Soda Mountains (USGS 2024a). The valley generally slopes eastward toward a dry wash mapped east of the subject property. The subject property ranges in elevation from approximately 1,280 to 1,500 feet above mean sea level.

# 3.2 Geology and Hydrogeology

The subject property lies primarily within an area mapped as Quaternary alluvium and marine deposits. This mapping unit is described as unconsolidated and semi-unconsolidated alluvium and lake, playa, and terrace deposits. The southwest corner of the subject property is mapped as Tertiary volcanic flow rocks, unit 16 (Northern Mojave Desert). This mapping unit is described as tertiary volcanic flow rocks and minor pyroclastic deposits (USGS 2024b).

The subject property is within the Soda Lake Valley Groundwater Basin, which underlies a northeast—southwest-trending valley in northeast San Bernardino County. Elevation of the valley floor ranges from 923 to approximately 3,500 feet above mean sea level (California Department of Water Resources 2024a, 2024b).

Generally, groundwater flow direction has been inferred based on topography in the vicinity of the subject property with the assumption that shallow groundwater flow will follow surface topography. No site-specific measurements of groundwater depth and flow direction have been performed.

State well registry data identified no water wells on the subject property. One municipal well is mapped southwest of the subject property; water depth and total depth of well is not reported at this location (California State Water Resources Control Board 2024a, 2024b). A map of well locations is provided in Appendix C.

## 3.3 Soils

A review of soils data from the Natural Resources Conservation Service (NRCS) Web Soil Survey indicates that the soil types present at the subject property consists of Rillito–Gunsight, Rositas–Carrizo, and Rock outcrop soil complexes (NRCS 2024a).

Location-specific soil data are readily available from the NRCS (2024a, 2024b) and via an interactive KMZ file from the California Soil Resource Lab (2024). These soil types are described in Table 1.

Table 1. Soil Types on the Subject Property

Soil Name	Description
Carrizo	The Carrizo series consists of very deep, excessively drained soils formed in mixed igneous alluvium. Carrizo soils are on numerous landforms on floodplains, fan piedmonts, and bolson floors. Slopes range from 0 to 15 percent.
Gunsight	The Gunsight series consists of very deep, somewhat excessively drained, strongly calcareous soils that formed in alluvium from mixed sources. Gunsight soils are on fan terraces or stream terraces and have slopes of 0 to 60 percent.
Rillito	The Rillito series consists of very deep, somewhat excessively drained soils that formed in mixed alluvium. Rillito soils are on fan terraces or stream terraces. Slopes are predominantly 0 to 5 percent, but range to 40 percent.
Rock outcrop	Miscellaneous soil unit.
Rositas	The Rositas series consists of very deep, somewhat excessively drained soils formed in sandy eolian material. Rositas soils are on dunes and sand sheets. Slopes range from 0 to 30 percent with hummocky or dune micro relief.

Source: NRCS (2024b).

#### 4 HISTORICAL PROPERTY USES AND RECORDS REVIEW

The history of the subject property and adjoining properties was reviewed in accordance with the ASTM standard, except as noted in Section 1.3. Historical uses of the subject property were determined based on a review of readily available, reasonably ascertainable data, including topographic maps, aerial photographs, and interviews.

# 4.1 Historical Topographic Map Review

SWCA reviewed USGS topographic maps of the area dated 1933 to 2021, provided by the USGS (2024a) and Nationwide Environmental Title Research, LLC (Nationwide) (2024). The subject property and vicinity are depicted as primarily vacant and undeveloped in 1933; a roadway (present-day I-15) is mapped along the western boundary of the main portion of the subject property. No significant changes are noted until the 1957 topographic map when an unimproved roadway is mapped through the subject property in a northeast—southwest orientation. A transmission line is mapped through the west end of the gen-tie line portion of the subject property.

By 1983, a levee is mapped parallel to I-15 and an underground gas line is mapped west of I-15. A beacon station and a borrow pit are mapped in the southwest corner of the subject property. Structures are mapped at the present-day location of the Rasor Road Service, Inc., station.

No other significant changes were evident in SWCA's review of subsequent USGS topographic maps. It appears the subject property and surrounding area have remained relatively unchanged since 1933.

# 4.2 Historical Aerial Photograph Review

SWCA reviewed historical aerial photographs of the subject property spanning from 1978 to 2023 (Google Earth 2024; Nationwide 2024). In 1978, the subject property was primarily vacant desert land; one unimproved roadway is visible within the subject property in a northeast–southwest orientation. A borrow pit is visible in the southwest corner of the subject property. I-15 runs along the west side of the main portion of the subject property and crosses the gen-tie line portion of the subject property. A transmission line corridor is visible through the west end of the gen-tie line portion of the subject

property. Rasor Road Service, Inc. (discussed in Section 5.2 below), is visible southwest of the subject property. Other surrounding properties are similar vacant desert land.

By 1983, the borrow pit within the subject property no longer appears to be active. A new borrow pit is visible northwest of the gen-tie line portion of the subject property. This second borrow pit appears to be inactive by 1995.

No additional significant changes to the subject property or adjoining properties were noted in SWCA's review of aerial photographs.

# 4.3 Sanborn Maps and City Directories

Based on our professional experience with similar historically undeveloped properties, Sanborn fire insurance maps were assumed to not be available for the subject property, and a city directory search would not have yielded useful information.

# 4.4 Previous Phase I Environmental Site Assessment Reports

SWCA completed a Phase I ESA report for the subject property in September 2022 and June 2023; no RECs were identified during the completion of the report (SWCA 2022, 2023).

## 4.5 Interviews

Ziad Alaywan, representing APEX Energy Solutions, completed a Phase I ESA User Questionnaire regarding the subject property on July 1, 2024. Z. Alaywan noted that the purchase price being paid for the subject property reasonably reflects its fair market value. Z. Alaywan does not know of any past uses of the subject property other than cattle grazing. Z. Alaywan does not know of any significant spills or chemical releases, or environmental cleanups that have occurred on the subject property and is not aware of any obvious indicators that point to the presence or likely presence of releases at the subject property.

SWCA attempted to contact the landowner of the subject property, the Bureau of Land Management, at the time of reporting a response had not been received.

SWCA spoke with Jeffery Childers, Associate Field Manager for the BLM Barstow Field Office, on June 16, 2023, during completion of the previous Phase I ESA. He stated that the subject property is entirely vacant land with no tanks or known releases. He stated that at one point, there were grazing leases on the subject property but that it had not been grazed in over 10 years.

Documentation of the above correspondence is provided in Appendix D.

# 4.6 Environmental Liens and Activity and Use Limitations

Completion of searches for recorded environmental liens and AULs is a responsibility of the user of a Phase I ESA. It is the user's responsibility to obtain and review title records back to 1980 (the year CERCLA was enacted); however, Z. Alaywan, representing APEX Energy Solutions, indicated on July 9, 2024, that he is not aware of any environmental cleanup liens for the subject property. Z. Alaywan indicated there are AULs in place on the subject property due to the subject property being federally-owned and administered by the Bureau of Land Management.

#### 5 ENVIRONMENTAL RECORDS REVIEW

SWCA conducted an environmental records review to establish the environmental history of the subject property and surrounding area to ascertain whether hazardous waste or hazardous material management, handling, treatment, or disposal activities have occurred on or near the subject property.

#### 5.1 Federal and State Environmental Records

An environmental database search report generated by Environmental Data Resources, LLC (EDR), on June 13, 2024, was used to access environmental records for the subject property and surrounding properties. The databases searched by EDR include those specified by ASTM Standard E2247-16, as well as several additional federal and state databases and databases proprietary to EDR. EDR updates its records in accordance with ASTM Standard E2247-16 guidelines, and ASTM's standard search distances were followed (Table 2). Additional listed facilities that EDR has not identified may exist within a 1-mile radius.

**Table 2. Approximate Minimum Search Distances** 

Record Sources	Approximate Minimum Search Distance (miles)
Federal Databases	
National Priorities List (NPL)	1.0
Delisted NPL	0.5
CERCLA/CERCLA No Further Remedial Action Planned sites	0.5
Resource Conservation and Recovery Act (RCRA) Corrective Action Sites (CORRACTS) facilities	1.0
RCRA non-CORRACTS Treatment, Storage, and Disposal facilities	0.5
RCRA generators list	Subject property and adjoining
Institutional control/Engineering control registries	Subject property only
Emergency Response Notification System	Subject property only
State and Tribal Databases	
NPL/"Superfund" state equivalent	1.0
Hazardous waste facilities	0.5
Landfill and solid waste disposal site lists	0.5
Leaking storage tank lists	0.5
Registered storage tank lists	Subject property and adjoining
Institutional control/Engineering control registries	Subject property only
Voluntary cleanup sites	0.5
Brownfield sites	0.5

Source: ASTM (2021).

SWCA also reviewed supplemental records from state and federal regulatory databases at the California Department of Conservation (2024a, 2024b), California Department of Toxic Substances Control (2024), California State Water Resources Control Board (2024b), U.S. Army Corps of Engineers (2024), U.S. Department of Transportation (2024), and U.S. Environmental Protection Agency (2024a–2024d). A copy of the environmental database search report is included in Appendix E.

# 5.2 Environmental Database Listings

SWCA's review of the EDR database report and supplemental records from state and federal regulatory databases found the following:

- The subject property is not identified on any of the regulatory databases reviewed by SWCA.
- Rasor Road Service, Inc., mapped on the subject property by EDR but physically adjoining the west side of the subject property at 66150 Rasor Road, is listed in the following databases: Hazardous Waste Tracking System (HWTS), underground storage tanks (USTs), California Emergency Response System Hazardous Waste (CERS HAZ WASTE), CERS TANKS, Emissions (EMI), San Bernardino County Permits, and CERS. The HWTS database indicates the site is designated as an inactive, permanent gasoline service station. The facility contains an unspecified number of USTs associated with a gasoline service station. No leaking USTs have been reported at this facility. The CERS database identifies this facility as a chemical storage facility. Multiple CERS violations are noted at this facility, including failure to test leak detection equipment every 12 months, failure to obtain a UST construction permit and plan approval, failure to maintain UST records, failure to comply with any of the applicable requirements of the permit, and failure to maintain secondary containment, among others. All violations except one are noted as returned to compliance. A violation was issued on March 4, 2022, during secondary containment certification for fill sump failure during testing. The facility is required to submit a scope of work for the repairs for all failures that were recorded during the certification. This facility is situated at a topographically downgradient position with respect to the subject property; surface water, and presumably groundwater, are expected to flow southwest away from the subject property.
- ATC Rasor Road Site #300847, a cell tower site approximately 0.1 mile south of the subject property on Rasor Road, is listed on the CERS and San Bernardino County Permits databases. A CERS violation was noted in 2014 that was returned to compliance.
- AT&T Mobility Rasor Road #48433, a cell tower site located approximately 0.1 mile west of the subject property at Rasor Road and I-15, is listed on the CERS and San Bernardino County Permits databases. No violations are noted at this location.
- No gas transmission pipelines are mapped on or near the subject property. One hazardous liquid pipeline that possibly will be crossed by the proposed gen-tie line is mapped west of I-15. No pipeline incidents (gas) or accidents (liquid) are reported on or near the subject property.
- EDR database reports also identify unmapped sites (sites or facilities that are listed in one or more regulatory agency databases but that could not be readily mapped because of incomplete address or location information). Seventy-one unmapped site was identified within the search area. SWCA reviewed these listings, these sites are not believed to be relevant to the subject property because of the type of listings and its distance from the subject property.

# **6 PROPERTY RECONNAISSANCE**

Bill Kendig of SWCA completed the Phase I ESA site investigation for the subject property on June 17–18, 2024. The subject property was accessed by on-site access roads and by walking throughout the site. Photographs taken during the property reconnaissance are included in Appendix F.

# 6.1 Property Inspection

The subject property is primarily vacant desert land. I-15 bisects the subject property; the main portion of the subject property is along the southeast side of the highway with a proposed gen-tie line and substation portion of the subject property located northwest of the highway. An unimproved roadway runs through the main portion of the subject property in a general northeast—southwest orientation. An electrical transmission line runs through the proposed substation portion in the northwest part of the subject property. No additional improvements were noted within the subject property.

A gasoline service station (Rasor Road Service, Inc.) is southwest of the subject property. The remainder of the parcels in the vicinity of the subject property consist of vacant desert land.

No significant quantities of hazardous substances or petroleum products were observed on or adjoining the subject property. No evidence of significant spills, ground staining, unusual odors, or potential contamination was observed on or adjoining the subject property during the site reconnaissance (Table 3).

Table 3. Features, Activities, Uses, and Conditions on the Subject Property

Item	Present	Notes
Structures	No	Not applicable (N/A)
Roads	Yes	No concerns
Potable water supply/source	No	N/A
Sewage disposal system	No	N/A
Hazardous substances and petroleum products in connection with identified uses	No	N/A
Storage tanks	No	N/A
Strong, pungent, or noxious odors	No	N/A
Standing surface water and pools or sumps containing liquids likely to be hazardous substances or petroleum products	No	N/A
Drums, totes, and intermediate bulk containers	No	N/A
Hazardous substance and petroleum product containers not in connection with identified uses	No	N/A
Unidentified substance containers	No	N/A
Polychlorinated biphenyl–containing items	No	N/A
Heating/Cooling	No	N/A
Stains or corrosion on floors, walls, or ceilings (not water)	No	N/A
Drains and sumps	No	N/A
Pits, ponds, or lagoons	No	N/A
Stained soil or pavement	No	N/A
Unduly stressed vegetation	No	N/A
Solid waste disposal	No	N/A
Water/Wastewater discharge	No	N/A
Wells	No	N/A
Septic systems or cesspools	No	N/A

# 7 PHASE I ENVIRONMENTAL SITE ASSESSMENT FINDINGS

The following list presents selected primary findings of this Phase I ESA:

- SWCA's review of historical topographic maps and aerial photographs dating from 1933 found that the subject property was vacant desert land in 1933 and largely remains so today. By the late 1950s, a transmission line was mapped through the west end of the gen-tie line portion of the subject property. A borrow pit was visible in the southwest corner of the subject property on photographs dated between 1978 and 1983. The past use of the subject property is not considered to be a recognized environmental condition (REC). The following was noted regarding the adjoining properties:
  - o Rasor Road Service, Inc. (a gasoline service station) was located on a southwest-adjoining property since the late 1970s.
- SWCA's contact with Ziad Alaywan, representing APEX Energy Solutions, on July 1, 2024, did not identify anything that SWCA considers to be a REC.
- SWCA attempted to contact the landowner of the subject property, the Bureau of Land Management, at the time of reporting a response had not been received.
- SWCA's review of a June 13, 2024, Environmental Data Resources, LLC (EDR), environmental database search report and supplemental records from state and federal regulatory databases identified the following:
  - The subject property is not identified in any of the regulatory databases reviewed by SWCA.
  - Rasor Road Service, Inc., mapped on the subject property by EDR but physically adjoining the west side of the subject property at 66150 Rasor Road, is listed on the following databases: Hazardous Waste Tracking System (HWTS), underground storage tanks (USTs), California Emergency Response System Hazardous Waste (CERS HAZ WASTE), CERS TANKS, Emissions (EMI), San Bernardino County Permits, and CERS. The HWTS database indicates the site is designated as an inactive, permanent gasoline service station. The facility contains an unspecified number of USTs associated with a gasoline service station. No leaking USTs have been reported at this facility. The CERS database identifies this facility as a chemical storage facility. Multiple CERS violations are noted at this facility, including failure to test leak-detection equipment every 12 months, failure to obtain a UST construction permit and plan approval, failure to maintain UST records, failure to comply with any of the applicable requirements of the permit, and failure to maintain secondary containment, among others. All violations except one are noted as returned to compliance. The most recent violation was issued on March 4, 2022, during secondary containment certification for fill sump failure during testing. The facility is required to submit a scope of work for the repairs for all failures that were recorded during the certification. Because of the location with respect to the subject property and the status of the listings, and because testing as recently as March 2022 would have likely identified potential leaks, this is not considered a REC for the subject property.
  - No gas transmission pipelines are mapped on or near the subject property. One hazardous liquid pipeline that possibly will be crossed by the proposed gen-tie line is mapped west of I-15. No pipeline incidents (gas) or accidents (liquid) are reported on or near the subject property.

- SWCA's reconnaissance of the subject property on June 17–18, 2024, verified that it is almost entirely vacant desert land. SWCA did not identify any RECs during the site reconnaissance. The following was also observed:
  - O An unimproved roadway runs through the main portion of the subject property in a general northeast—southwest orientation.
  - An electrical transmission line runs through the proposed substation portion in the northwestern part of the subject property.
  - A gasoline service station (Rasor Road Service, Inc.) is southwest of the subject property. The remainder of the parcels in the vicinity of the subject property consist of vacant desert land.
  - No significant quantities of hazardous substances or petroleum products were observed on or adjoining the subject property. No evidence of significant spills, ground staining, unusual odors, or potential contamination was observed on or adjoining the subject property during the site reconnaissance.

# 8 PHASE I ENVIRONMENTAL SITE ASSESSMENT CONCLUSIONS

SWCA has completed a Phase I ESA of the subject property based on information obtained during the site investigation and the information obtained through the activities of this Phase I ESA, excluding the limitations. The information contained in this report relates only to the subject property and should not be extrapolated or construed to apply to any other site. The description of the subject property as provided herein represents the conditions of the subject property as it existed on the date of the site reconnaissance and data source searches.

We have performed a *Phase I ESA* in conformance with the scope and limitations of ASTM International Standard E2247-16 of the *subject property*, as described in Section 2 of this report. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this *report*. **This assessment has revealed** *no RECs, controlled RECs*, or *significant data gaps* in connection with the *subject property*.

## 10 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 312.10 of 40 Code of Federal Regulations (CFR) 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312. My qualifications are presented in Appendix B of this report.

Heather S. McFeeters
Environmental Professional / Project Environmental Scientist

# **APPENDIX A**

**Phase I Environmental Site Assessment Scope of Work** 

#### TASK 9. PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE

SWCA will provide an updated Phase I Environmental Site Assessment (ESA) report for the Soda Mountain Solar Project in San Bernardino County, California. The Phase I ESA update will be completed in general accordance with the standards described in the current ASTM Standard E2247-16, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property (2016). The Phase I ESA task will be directed by a qualified Environmental Professional as required by the ASTM Standard.

The Phase I ESA findings will be summarized and documented in one report. Sections within the report will include 1) a description of the site, 2) summaries of the site history and interviews, 3) a regulatory database review, 4) a description of the site reconnaissance, 5) report findings and conclusions, and 6) figures and appendices. Each report will include SWCA's professional opinion concerning the environmental disposition of the site regarding the presence of REC's. Report limitations and all literature cited will also be included.

According to the ASTM Standard, the content of a Phase I ESA is valid for 180 days after the first data is collected. If the date of the intended use for Phase I ESA is not within 180 days, an update may be necessary. Non-scope issues identified in the ASTM Standard include radon, lead and asbestos, radioactivity, regulatory compliance, wetlands, and endangered species. Non-scope issues will not be addressed in the report.

#### Deliverables:

• Phase I Environmental Site Assessment Update

#### **ASSUMPTIONS**

#### **GENERAL ASSUMPTIONS**

- Access to all parts of the affected site will be organized by the client prior to the site visits.
- SWCA personnel will have free access to the site for the duration of field surveys.
- Anything not stated explicitly above is not included in this scope of work.
- All deliverables will be transmitted electronically.

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE

- The subject property has not changed significantly since completion of the June 2023 report.
- This scope of work includes one round of revisions to the report text. Substantial revisions, such as a revised scope or project area, will incur additional cost.
- No provision is included for delays due to land access, coordination, weather issues, or other factors beyond SWCA's control. Delays are not included in our cost estimate.
- SWCA assumes site reconnaissance activities will be conducted concurrently with other field activities. A
  separate mobilization may incur additional costs.
- Any task not expressly described herein is not included in the proposed cost.
- Changes to the project footprint or scope of work during the project will incur additional cost.
- The date of the intended use of the Phase I ESA is within 180 days of the completion of the report.
- SWCA's Initial Data Request and the ASTM User Questionnaire are returned to SWCA promptly upon commencement of the project.

# APPENDIX B Environmental Professional's Credentials

# **HEATHER MCFEETERS, B.S., PROJECT ENVIRONMENTAL SCIENTIST**

Heather McFeeters is a project environmental scientist and project manager at SWCA Environmental Consultants (SWCA) with more than 22 years of experience in a variety of disciplines within the environmental field, including regulatory compliance, water resource management, and engineering. She provides consultation in the public and private sectors on projects including renewable energy; natural gas well and pipeline development; public utility infrastructure; and commercial, industrial, and residential land development.

Heather has completed Phase I Environmental Site Assessments in a variety of settings across the country including renewable energy sites ranging from small community solar facilities to several thousand-acre wind farms, industrial and commercial sites, and residential areas. Heather also has regulatory and permitting experience relative to Clean Water Act (CWA) 404/401 utilizing both the U.S. Army Corps of Engineers (USACE) Nationwide Permit Program as well as state programmatic general permit programs. She has managed and completed projects requiring consultation with the USACE, U.S. Fish and Wildlife Service (USFWS), and multiple state environmental protection agencies (EPAs) throughout the northeast, midwest, and southeastern United States. Her experience also includes serving as an environmental engineer for a state environmental agency overseeing the review and permitting of erosion and stormwater control facilities.

Heather also has extensive experience conducting waters of the United Sates (WOTUS) delineations and reporting, as well as threatened and endangered species habitat assessments.

#### **SELECTED PROJECT EXPERIENCE**

Wind Energy Facility Phase I Environmental Site Assessment; Confidential Client. SWCA conducted a Phase I ESA in accordance with ASTM 2247-16 for a proposed wind energy facility on 7,830 acres in Oklahoma. SWCA has completed multiple updates to support the project through design and financing. Role: Environmental Professional and Project Manager.

Solar Energy Facility Phase I Environmental Site Assessment; Confidential Client. SWCA conducted a Phase I ESA in accordance with ASTM 2247-16 for a proposed solar energy facility on approximately 2,000 acres in New Mexico. SWCA has completed multiple updates to support the project through design, financing, and construction. Role: Environmental Professional and Project Manager.

Wind Energy Facility Phase I Environmental Site Assessment; Confidential Client. SWCA conducted a Phase I ESA in accordance with ASTM 2247-16 for a proposed wind energy facility on approximately 58,500 acres in central Texas. Role: Environmental Professional and Environmental Specialist.

Wind Energy Facility Phase I Environmental Site Assessment; Confidential Client. SWCA conducted a Phase I ESA in accordance with ASTM 2247-16 for a proposed wind energy facility on 6,300 acres in eastern North Carolina. SWCA has completed multiple updates to support the project through design and financing. Role: Environmental Professional and Project Manager.

Battery Energy Storage System Site; Confidential Client. SWCA conducted a Phase I ESA in accordance with ASTM 1527-21 for a proposed battery energy storage system in southern Washington. Role: Environmental Professional and Project Manager.

Roswell Gas Plant Site; Confidential Client. SWCA conducted a Phase I ESA in accordance with ASTM 1527-21 for a site formerly developed with a historic power plant in Roswell, New Mexico. Role: Environmental Professional.

# PHASE I ENVIRONMENTAL SITE ASSESSMENT (ESA) USER QUESTIONNAIRE

(to be completed by each party that will rely upon the report)

Completed by: APEX Energy Solutions, LLC ZIAD ALAYWAN

Date: July 1, 2024

Site Name: Soda Mountain Solar Project, LLC

#### INTRODUCTION

In order to qualify for one of the *Landowner Liability Protections (LLPs)* <sup>1</sup> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments")<sup>2</sup>, the *user* must conduct the following inquires required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

The *user* is defined as "the party seeking to use Practice E1527 to complete an *environmental site assessment* of the *property*. A *user* may include, without limitation, a potential purchaser of *property*, a potential tenant of *property*, an owner of *property*, a lender, or a *property* manager. The *user* has specific obligations for completing a successful application of this practice outlined in Section 6" of ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

1) Environmental cleanup liens that are filed or recorded against the *property* (40 CFR 312.25) – Did a search of *recorded land title records* (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed against the *property* under federal, tribal, state, or local law? ( ) Yes (X) No If yes, please describe:

Note 1 – In certain jurisdictions, federal, tribal, state, or local statuses, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

2) Activity and land use limitations that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and vi) – Did a search of *recorded land title records* (or judicial records where appropriate, see Note 1 above) identify any Activity and Use Limitations (AULs), such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law? (X) Yes ( ) No. If yes, please describe:

Federally-owned property administered by the Bureau of Land Management

<sup>&</sup>lt;sup>1</sup> Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.

<sup>&</sup>lt;sup>2</sup> Public Law 107-118.

3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28) - Do you have any specialized knowledge or experience related to the <i>property</i> or nearby properties? For example, are you involved in the same line of business as the current or former <i>occupants</i> of the <i>property</i> or an adjoining <i>property</i> so that you would have specialized knowledge of the chemicals and processes used by this type of business? (X)Yes ( ) No If yes, please explain:					
4) Relationship of the purchase price to the fair market value of the <i>property</i> if it were not co (40 CFR 312.29) – Does the purchase price being paid for this <i>property</i> reasonably reflect the fair the <i>property</i> ? (X) Yes ( ) No					
If you conclude that there is a difference, have you considered whether the lower purchase price is contamination is known or believed to be present at the property? ( ) Yes ( ) No If yes, please					
5) Commonly known or reasonably ascertainable information about the property (40 CFR 312 Are you aware of commonly known or reasonably ascertainable information about the property to the environmental professional to identify conditions indicative of releases or threatened releases?	hat would help				
as <i>user</i> ,  a. Do you know the past uses of the <i>property</i> ?					
Undeveloped Desert Land					
b. Do you know of specific chemicals that are present or once were present at the <i>proper</i>	rty?				
c. Do you know of spills or other chemical releases that have taken place at the <i>property</i> <b>No</b>	?				
d. Do you know of any environmental cleanups that have taken place at the <i>property</i> ?					
<ul> <li>e. Do you know of any previous Phase I Environmental Site Assessment performed for ( ) Yes (X No. If yes, can copies be provided?</li> </ul>	the <i>property</i> ?				
f. If available, please provide contact information for someone knowledgeable about par property (present or past owner, operator or occupant).	st uses of the				
6) The degree of obviousness of the presence or likely presence of contamination at the <i>prope</i>	erty, and the				

ability to detect the contamination by appropriate investigation (40 CFR 312.31) – Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence

of releases at the *property*? ( ) Yes (X) No If yes, please describe:

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIFECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

#### **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### SUBJECT PROPERTY INFORMATION

#### **ADDRESS**

68347-001 SODA MOUNTAIN BAKER, CA 92309

#### TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of state and tribal registered storage tanks

**UST: Active UST Facilities** 

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within the requested target property.

EMI: Emissions Inventory Data

A review of the EMI list, as provided by EDR, and dated 12/31/2021 has revealed that there is 1 EMI site within the requested target property.

Site	Address	Map ID / Focus Map(s)	<u>Page</u>
RASOR ROAD SERVICE, Facility Id: 21300812 Facility Id: 812	66150 RASOR ROAD	A3/9	41

HWTS: Hazardous Waste Tracking System

A review of the HWTS list, as provided by EDR, and dated 01/26/2024 has revealed that there is 1 HWTS site within the requested target property.

Site	Address	Map ID / Focus Map(s)	Page
RASOR ROAD SERVICE	66150 RASOR RD	A2/9	40

**CERS: CERS** 

A review of the CERS list, as provided by EDR, and dated 01/16/2024 has revealed that there is 1 CERS site within the requested target property.

Site	Address	Map ID / Focus Map(s)	Page
RASOR ROAD SERVICE,	66150 RASOR ROAD	A3/9	41

#### **EXECUTIVE SUMMARY**

UST FINDER: UST Finder Database

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within the requested target property.

Site	Address	Map ID / Focus Map(s)	Page
RASOR ROAD SERVICE I	66150 RASOR RD	A6 / 9	72

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of state and tribal registered storage tanks

**UST: Active UST Facilities** 

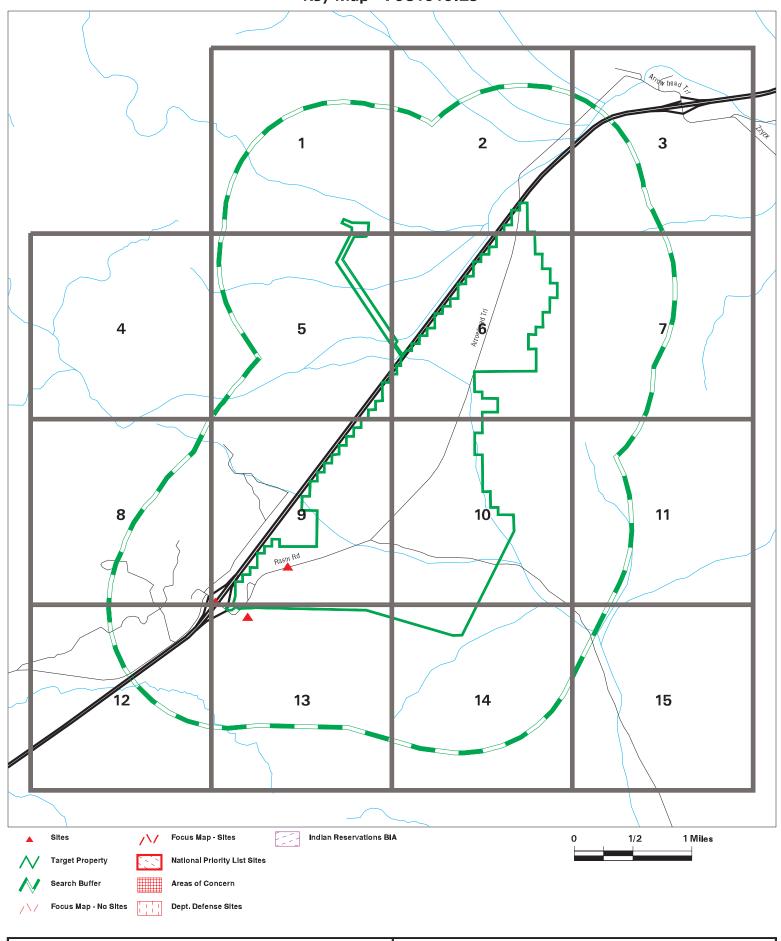

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the requested target property.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

### Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023 Date Data Arrived at EDR: 12/20/2023 Date Made Active in Reports: 01/24/2024

Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/22/2024

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/22/2024 Date Data Arrived at EDR: 05/01/2024 Date Made Active in Reports: 05/24/2024

#### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023

Number of Days to Update: 6

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023

Next Scheduled EDR Contact: 07/01/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

#### Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/11/2024 Date Data Arrived at EDR: 03/12/2024 Date Made Active in Reports: 05/10/2024

### **DEED: Deed Restriction Listing**

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

#### EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention, ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

#### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

### PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

### PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

### **EDR HIGH RISK HISTORICAL RECORDS**

**EDR Exclusive Records** 

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.
