Strong Objections to the Lithium Battery Storage Facility

This is a VERY BAD IDEA!!! It is too close to residential and major transportation areas. The recent issues of trucks carrying Lithium Ion batteries colliding, catching fire and causing major road closures, as well as toxic plumes or incidents of storage units catching fire in North San Diego County are GLARING examples of why this proposed location is such a poor choice. I doubt the owners, builders live in the area!! We DO NOT want to live in an area where these batteries are placed. Turn this down!!!
