Do Not Allow Any Lithium Battery Storage

Please do not allow the Lithium Battery Storage companies to go around the people & the government of Vacaville, California & Solano County. My family & I live in the rural area very near to where these locations continue to be proposed. We are dependent on well water & these facilities are not safe - for our water or the air we breathe. The population of Vacaville & the unincorporated area have repeatedly spoken up, We have attended multiple city & county meetings & have continually voiced our disagreement with having these facilities as a part of our future. Please listen to us & quit making us repeat the same information over & over again.

After attending multiple meetings over the last few years to communicate our concerns, I have noticed one thing continuously. I have never - ever - heard anyone stand & voice support for these facilities other than the representatives of the Lithium Battery Storage facility itself. I have not heard one person who lives or works in the area voice support for these projects. That should say something by itself.
