Opposition to proposed project from School Board Trustee of impacted Area

As an elected official representing the residents of Northern Vacaville and many Solano County residents outside of the cities boundaries and as a resident in Solano County, I am adamantly opposed to the construction of a BESS facility in the proposed area. It is near many homes, but also very near two major highways and Northern Solano Counties only Level 1 trauma center, and the proposed site of the first school that if constructed would be the first built for Vacaville Unified School District students in over 30 years. The increased risks associated with a BESS facility could very well disrail the District's plans to construct a school in this area that currently has no school.and is sorely overdue for one. Energy planning must be done in a manner that allows for all parties impacted to be considered and the student's and families in our community should not be short changed because of a failure to ensure that their educational needs are able to be met.
