Opposition to Proposed Compass Energy Storage Project (24-OPT-02)

My husband and I are probably among the very closest houses at the top of the adjacent hill to this ridiculous project proposal and are scared to death of it because it could literally destroy our home in minutes and even kill us were a fire to break out. And make no mistake, these Lithium Storage facilities are a very high fire danger. They do NOT belong in a populated community next to homes, schools and transit areas especially when there is high fire danger to begin in with

We hiked down the hill yesterday nearly to the site of this "proposed project." The area is completely filled with dried thistle and mustard seed. A fire would consume that hillside in no time.

Obviously, however, the developer does not care, as they are from France. They have no interest in what our community has to say, which is why they are ignoring our very real concerns about the threat of destruction to our homes and community and going to the state.

Please end this nightmare for the people of San Juan and Laguna Niguel NOW!
