Battery Strage

Thank you for taking the time to read this...I am writing in opposition of both plants being considered...as you know there is a commity that has been working on better and safer locations...the public has not opposed battery storage in Vacaville...just the locations they are being proposed to...It's a downfall for Corby since they jumped the gun and purchased the property...maybe a new farmer would like to purchase it...the locations that are being purposed are within 1 mile of both major freeways in the area and well over 12,000 people..Not including Kaiser hospital.where are we supposed to go with both freeways shut down...just Imagine 12k folks trying to evacuate a 1 mile area and there is literally no where to go...in the meantime they are breathing in all the toxins...please please work with are committy and find a better placement of these plants...there are other options..now if you take the dangers out of the lithium and use sodium instead I can assure you that the people would accept it alot better...I understand it's more costly but so much safer...so from this retired old lady who just wants to continue remaining safe please don't approve these facilities in the areas proposed...I do have a question that I would like answered...Why do the folks in Vacaville have to take the dangers of lithium and the energy gets sold to San Francisco.

Thank you Pam Barringer
