### **300-MEGAWATT storage**

I have a few concerns, are there provisions for emergency service training ?

What kind of environmental impact is projected if there is a fire.

Would I80 be shut down and for how long.

Is there an evacuation plan?

What kind of offset is planned for the surrounding community. (Compensation for inconvenience)

What is the potential chemical outgas makeup?

Is this a gateway for a larger facility given the infrastructure would be set up if approved.

It there is a fire is the run off contained.

How wide of an area would be evacuated? ( is there a map)
