Opposition to location of BESS ION Battery Storage

I have commented publicly to the city and the county in regards to proposed BESS Ion Storage facility of which I oppose the location so close to populated areas. There are more appropriate locations that would be much safer. BESS has bypassed the moratorium with Solano County that was highly supported by citizens that would be affected. Increased fire potential would increase our property insurance and decrease the value of our homes. Worries about possible health hazards would affect those that could not evacuate are valid. Worries about me and my neighbors soil and well water being contaminated are valid. These types of projects should be well researched, and located where they DO NO HARM.
