Battery Storage near Vacaville

This comment is my opportunity to voice concerns about the proposed Battery Storage facility before you from Corby. This project should not be allowed due to the dangers to public health in our area, plus the removal of prime ag land from production. The city of Vacaville and the Solano County Supervisors both passed moratoriums on this type of lithium-ion battery storage facilities until further studies were completed. This move to go directly to the state removes local control and puts our citizens and first responders at risk. I also do not know how energy could be slated for San Francisco from this project. When asked whether Vacaville could have some assurances of energy when it was discussed, the word was that energy stored here could not be "set-aside" for Vacaville.

Please vote against allowing this type of battery storage in this location.
