Docket Number: 24-OPT-05

Totally Against

It is irresponsible to construct a massive BESS at a location next to a major freeway, homes, businesses, hospital, etc. The intelligent site is in a area of very few people, homes, etc., like the two power peaker plants underneath the same power lines they want to connect to: the Lambie and/or Creed sites. This proposal is the result of this firms recognition of an extremely educated local population regarding the inherent hazards of this technology which are totally unacceptable to us. We get all of the hazards and none of the benefits. This firm is too lazy to properly site their project.
