## **Please do not authorize BESS facility in Solano County**

Hello, Commissioners. As I have gathered information from a variety of sources about the plans for the Corby BESS Project, I believe there are more negatives than positive aspects to the project. I ask the CEC to stop the project rather than authorizing it to continue, taking time to evaluate the need for another BESS in California. There are experts alerting us of an excess of stored energy in California which is backfiring on taxpayers and us residential energy consumers. Please examine this problems. Also, if a fire occurred at a BESS facility, does the local fire department have the expertise to handle it? I understand the Vacaville Fire Department has not gotten training to specifically handle a fire at a BESS facility.

These are the two negative points most significant to me. Please do not allow the Corby Battery Energy Storage System Project to proceed. Thank you for your consideration.

Joan Marquand-Willse
