Project Opposition

I am a community member in Vacaville against this project for the following reasons:

- 1) This project site is on prime agricultural land. Once it is built we cannot get it back. Our agricultural land is valuable and disappearing.
- 2) There is no benefit to the community. The energy has been sold to the City of San Francisco and Solano County is only bearing the risk.
- 3) Costs of fire department equipment and training will likely COST solano money which is passed to the taxpayer.
- 4) A lithium-ion fire at this facility would endanger our residents, first responders, and environment.

I am against this project as the benefits do not outweigh the risks. I have three children I am raising in this community and when the lifecycle of the project is up they are left with cleanup.
