No to Lithium battery plant

I do not wish to have a lithium battery plant any where near our community. Here are my reasons.

- 1) The county and city have active moratoriums on battery energy storage to get it right. Local government should have control over projects like these.
Â
- 2) This project site is on prime AG land. Once it's built, we can't get it back. Our AG land is valuable and disappearing.
Â
- 3) There is no benefit to the community. The energy has been sold to the City of San Francisco. Solano County is inheriting the risk.
Â
- 4) Costs of fire department's equipment and training will likely COST Solano money which will be passed to the taxpayer.
Â
- 5) A lithium-ion fire at this facility would endanger our residents, first responders and our environment.
