## **Vacaville majority votes no for Battery Facility**

- 1) The Vacaville City and Solano County have active moratoriums on battery energy storage. They currently are doing research to get more information. We share in the belief that "LOCAL" government should have control over projects like these. It directly impacts the residents of Vacaville and nearby communities.
- 2) This project site is on prime AG land. Once it's built, we can't get our irreplaceable land back. Our AG land is valuable and disappearing. We must protect our AG Land.
- 3) There is less benefit to the community. The energy has been sold to the City of San Francisco. Solano County is inheriting all the risks.
- 4) Costs of fire department equipment and training will likely COST Solano money which will be passed to the taxpayer.
- 5) A lithium-ion fire at this facility would endanger our residents, first responders, and our environment. It is not safe for Vacaville and nearby communities.
