## **NO TO BATTERY STORAGE IN VACAVILLE!**

To Whom It May Concern,

As someone who's grown up in Solano County, I have to say, this Battery Energy Storage System (BESS) project is a terrible idea. These systems are packed with toxic chemicals like lithium and cobalt that can leak or catch fire, putting our air, water, and health at serious risk. Why would we want something so dangerous in our backyard?

On top of that, this whole thing feels forced on us by the state. People here have already made it clear we don't want this kind of project, but it seems like our voices don't matter. That's not right.

There are safer, better ways to handle energy storage without putting Solano at risk. It's time to actually listen to the people who live here and say no to this project.
