Next Era and Corey facility placement

I am outraged that Next Era and Corey are trying to get around the moratorium by the city of Vacaville and Solano County by coming to you so they can build battery storage systems that are unsafe. There is safer technology available to store these batteries and if you will only look at the city of Davis, you will see what options are available. These companies do not take into consideration the dangerous technology they prefer to use because of cost.

Please don't be swayed by these companies and consider the will of the people of Vacaville and Solano County and their decision to safeguard our future.
