## **No on Corby BESS**

Please vote against the Corby BESS system. The city of Vacaville has already denied them for just cause. The location for this project is in a terrible location due to all of the small farms in the area plus Kaiser Hospital is within the affected area if there is a fire at the facility. Since the only way to fight a BESS fire is to let it burn out on its own with the fire dept keeping the surrounding area cool to prevent the spread of the fire, this could displace the farmers and the hospital patients for a very long period of time. All of the livestock and people that can't get out of the affected area fast enough will be adversely affected by the toxic fumes from the fire. The other problem with fighting the fire is any water runoff from the fire contaminating the ground water. The toxic waste from the fire will travel with the water into the aquifer that my well that my family drinks from. This is a huge potential problem that will affect many people on these small farms.

There are much better areas within Solano County for a BESS system. Two places that I can think of that has high power lines and switch yards that can support the system would be Cordelia Rd in Fairfield and Lambie Business Park on Lambie Rd in unincorporated Suisun City. Both of these areas already have power plants and have enough area around them that it will not adversely affect the area like the site that Corby BESS does.
