Registration Provider Applicant Certification Statement

Golden State Registry (GSR) certifies that its Data Registry is reliable, accurate, and operates in strict compliance with all requirements set forth in **Standards Section 10-103(a)** and **Appendix JA7**. The Data Registry has been rigorously developed and tested to ensure functionality, security, and adherence to the standards outlined in the **Data Registry Requirements Manual**.

This certification encompasses the following assurances:

1. **Data Reliability and Accuracy:**

The registry ensures all compliance document data, once entered, processed, and registered, is securely stored, tamper-proof, and accurate. Rigorous testing has verified that all system functionalities meet the requirements for data management and electronic registration of compliance documents.

2. **Security and Digital Integrity:**

GSR has implemented robust digital signature and data encryption mechanisms to guarantee the authenticity and integrity of all registered compliance documents. All registered documents are stored as tamper-resistant, non-editable PDF image files, and the system enables secure validation of digital certificates.

3. **Conformance to Requirements:**

The GSR Data Registry complies with all procedural and technical requirements outlined in the **Data Registry Requirements Manual**. These include but are not limited to:

- Data exchange protocols.
- Verification of compliance document authenticity.
- Secure retention and accessibility of compliance documents for authorized users.

4. **Commitment to Stakeholder Access:**

The registry ensures authorized access to compliance documents for all relevant stakeholders, including contractors, homeowners, raters, AHJs (Authorities Having Jurisdiction), and the California Energy Commission (CEC).

5. **Self-Testing and Validation:**

GSR has conducted rigorous internal testing to ensure the registry's compliance with all applicable standards and functional requirements. This self-testing has been documented and made available to the CEC for review.

6. **Support for CEC Testing:**

GSR welcomes the California Energy Commission's acceptance testing and verification of the registry's functionality and compliance, providing full access for review and validation purposes.

Signature:

Golden State Registry certifies the accuracy and reliability of this statement and the functionality of its Data Registry system as outlined above.
