Opposition to the Fountain Wind Project in Shasta County

I am strongly opposed to the proposed Fountain Wind Project in Shasta County, California. As a concerned resident of California, I have examined the available project information and I believe that this project poses significant risk during a wildfire that cannot be mitigated. As the county of Shasta has turned down the project based on such wildfire concerns and since the northern portion of California has experienced multiple catastrophic wildfires in recent years (Carr Fire, Camp Fire, Dixie Fire, Park Fire), putting a wind project in the proposed location that is a critical pathway for aerial attack on wildfires is simply too great of a risk to residents of northern California compared to the minor benefit that such a wind project might produce for the state. I respectfully request the project be declined.
