## **No on Fountain Wind Project**

I am urging you to oppose the Fountain Wind Project on the grounds that it is a fire risk, it endangers wildlife, especially birds, and the structures are manufactured in China. I have seen designs that are smaller and are quite effective; they are designed not to be a risk for birds and other wildlife. In addition, they are built in the United States. Please reconsider your intentions to force this project on a beautiful area in Northern California. Incidentally this project has no support among the residents of the area. We have voted it down in the past and are quite disgusted that the Newsom administration is trying to push it forward again.
