**NOTICE OF RECEIPT
PETITION TO AMEND
THE CALIFORNIA ENERGY COMMISSION DECISION FOR THE
RUSSELL CITY ENERGY CENTER (01-AFC-07C)**

On April 28, 2017, Russell City Energy Company, LLC (Petitioner), docketed a Petition to Amend the Final Decision for the Russell City Energy Center (01-AFC-07) (RCEC). The amended proposal is for the permanent installation of a 6,667 gallon tank for storage of sodium hydroxide. The facility is located in the industrial corridor of the city of Hayward, Alameda County, California.

DESCRIPTION OF PROPOSED MODIFICATION

The project owner proposes installing a permanent 6,667 gallon tank for storage of sodium hydroxide, which will be used in the project's zero liquid discharge (ZLD) facility and cooling tower for pH control. This on-site tank will be installed adjacent to the project's ZLD facility, and will replace the temporary tanks and temporary secondary containment structures that are currently in use. The permanent tank is double-walled for secondary containment purposes and approximately 15 feet in diameter.
