Opposition to Proposed Compass Energy Storage Project (24-OPT-02)

As we know from the horrific Eaton and Pacific Palisades fires currently going on... populated Southern California areas ARE NOT APPROPRIATE for dangerous energy installations that are known to be toxic and highly flammable.

I LIVE at the top of a hill, less than 1500 feet, from the proposed battery site which sits at the bottom..... and the thought of this ridiculous very dangerous site being installed so close to my home is extremely upsetting. It simply CANNOT HAPPEN. My life, my family's lives, my home, my neighborhood and neighbors... and in fact the entire community would be at risk for horrific fires.

The entire hill is filled with dried out vegetation and has numerous signs that say "FIRE HAZARD AREA".

I can't believe that this company from France is going ABOVE the will of the cities that would be directly impacted by this. Of course they don't care. The company is in FRANCE.

Please immediately put a stop to this. NO!

We see what runaway fires in strong winds can do to entire communities. This would worse, as it would involve NUMEROUS EXTREMELY TOXIC chemicals... and there would be a lot of deaths and mayhem.

Sincerely, Lisa Padgalskas
