Opposition to Proposed Compass Energy Storage Project (24-OPT-02)

This hazardous lithium battery facility would be located in the heart of a population and transportation hub at the base of a steep hillside filled with abundant natural wildlife and plant life. The vegetation becomes dried and highly flammable in the summer and fall. In fact, there are numerous signs posted on the hill's hiking trails warning "HIGH FIRE HAZARD AREA." (SEE PDF ATTACHMENT)

It is a beautiful but high fire-risk area surrounded by a dense community of homes, schools and businesses. This facility has the potential to cause not just damage, loss of property and grave bodily injury, but deaths to first responders, firefighters and members of the community population.

This is a ridiculous proposal of land use by a French company and must be denied immediately.

Thank you,

Lisa Padgalskas Hand
