Opposed to Lithium Battery Storage System in My Neighborhood

Hello,

I am writing because there is a lithium battery storage system proposed/planned in San Juan Capistrano, in an open area that abuts my neighborhood in Laguna Niguel. I and my neighbors are extremely concerned because of the huge fire risk should something go wrong at the storage facility (which is a very real possibility). The proposed location is surrounded by grass and brush, which is dry almost the entire year. Several neighborhoods would be under direct and immediate threat should a fire break out. Our concern was high before, but with the severity and destruction of the current Palisades and Eaton fires, the risk is truly terrifying. I am also concerned about the destruction of the beloved beautiful natural area where it would be located, but the fire risk is the greater concern by far. Please do not allow this project to go through!

Sincerely,

Tammy Plett
