No on BESS San Juan Capistrano

I don't know how this project can even be further considered to be approved given the fire at Moss Landing Facility on 1/16/2025 and still burning. Certainly the CEC has heard/read about the fire. And the Moss Landing area is not known for high winds and is much cooler year round than San Juan Capistrano. And much less dense in population than the site earmarked for the project by Engie North America LLC. Clearly there is no demonstrated mitigation from the Fire Departments to put out these fires with who knows what vapors are being emitted that require resident doors/window to remain securely closed. Vote No!
