Lithium battery farm Laguna Niguel

I would like the state to step in and reevaluate the proposed use of land sold by Saddleback Church in Laguna Niguel on the border of San Juan Capistrano for a lithium battery storage facility. Placing a lithium battery farm at the base of a canyon filled with brush with a known risk of fires that are difficult to mitigate and control seems like a known danger. This is not a NIMBY issue as much as the proposed location seems like a preventable accident waiting to happen
