Communities in Charge Funding Wave 2 Cost Reimbursement Webinar

Additional submitted attachment is included below.

Communities in Charge Funding Wave 2 Cost Reimbursement Webinar

The Communities in Charge Project team is excited to invite you to the Funding Wave 2 Cost Reimbursement Webinar!

Communities in Charge is designed to transform electric vehicle (EV) accessibility, rapidly catalyze new markets, and swiftly deploy Level 2 EV charging stations. Communities in Charge is California's market-accelerating, light-duty electric vehicle EV charging incentive project funded by the California Energy Clean Transportation Program and Greenhouse Gas Reduction Fund, implemented by CALSTART, and supported in partnership with GRID Alternatives and Tetra Tech.

Following the successful completion of their project sites, grant awardees become eligible to submit for cost reimbursements as a final payment. This webinar aims to support Funding Wave 2 awardees and prospective Communities in Charge applicants interested in understanding eligible project costs and the cost reimbursement process.

During the webinar, we will address the following topics:

- Review eligible project costs.
- Provide guidance to awardees on submitting supporting documents through the Incentive Processing Center.
- Establish clear expectations regarding invoices and other necessary documents for successful verification.
- Review timelines for submissions and the expected payment schedule.

The workshop will take place on:
January 30th, 2025
10:00 AM – 11:00 PM
Pre-registration is required; please register here.
