Opposed to Battery Storage Unit, SJC

I am entirely opposed to the proposed battery storage unit in San Juan Capistrano. This is a serious health and safety danger and moreover with the LA fires leaving homeowners unable to find insurance due to the high risk. This will handicap all surrounding neighborhoods from their prime home investment. The idea of allowing this to go further would pave the road to bring certain harm to a residential area, with schools, families, working people and a well established community that draws travelers to a highly visited San Juan Capistrano. Please halt and reevaluate any possibility of this coming to fruition.
