Lithium Storage Facility

I am a very concerned citizen of San Juan Capistrano that has been watching over the last few days, a lithium battery storage facility on fire in Northern California. Smoke, toxic fumes and pollution amongst who knows what else has been filling the air. This is a huge red flag. Please do not bring anything of that to our town or to any town where it can affect any community and people living near it. There are plenty of spaces out in the middle of the desert where no human life will be affected. Keep it out of our town.

Thank you in advance for moving the site out of Orange County and San Juan Capistrano.

Maria Germann (mom and future grandmother of a baby girl and many more)
