No BESS In San Juan Capistrano

I am writing this comment in opposition to the proposed plan to build a BESS plant in the City of San Juan Capistrano. When Lithium-Ion (Li-Ion) batteries are stored together; as they are in BESS plants, there's a risk for a chain reaction where one battery overheats, catches fire and ignites adjacent batteries. Such an event may lead to explosions and dangerous gases escaping into the environment. Li-Ion batteries pose serious fire risks. We can not take this risk in historically dry terrain of California; especially after witnessing the recent devastating fires fueled by dry brush in and around Los Angeles which have claimed lives, personal property and businesses. Please do not let Compass Energy Storage, LLC move forward with this plant in San Juan Capistrano.
