## **Batty storage San Juan cap**

I don't understand why it would be a good idea to put that dangerous storage facility close to the nuclear storage at San onofre close to inhabited suburbia and right next to the major freeway if that thing explodes or catches on fire, we might have the freeway closed down in both directions for weeks. Let alone the toxic fumes that are going to paralyze this community. Please put it out in the middle of the desert, where the train goes by there, but where people don't live come on.
