## **We don't want this dangerous facility near our home**

These facilities should never be near peoples homes! Look at recent fires and newest explosion of the lithium battery storage facility up north. This particular proposed facility is in a fire and flood zone (not to mention near public transportation) and proposes a direct threat to lives, property and the environment! Home owner insurance premiums will go through the roof or just cancel us as we are already in a risky area. We had a nearby fire around the proposed facility less than 5 years ago. Just because it appears to be a convenient and lower cost solution for the utility company does not make it a sound option for us! It is not welcome here in our backyard!
